

Arian Islam

+61405001077 — arianislam.010@gmail.com — github.com/HotelBudapest

Education

- **University of Sydney**, Bachelor of Advanced Computing (3rd Year), *Dalyell Scholar* *2023–Present*
 - **Major:** Computer Science, **Minor:** Cyber Security
- **Certifications**
 - **Databricks Data Analyst Associate**, Databricks ([View Certificate](#)) *September, 2025*

Relevant Work Experience

- **Faculty of Engineering**, Research Assistant *July 2026 – Present*
 - Developing research protocols and driving the execution of research activities. Currently working alongside researchers and stakeholders ON: **AI-assisted learning tools, Process Automation and broader research workflows.**
- **Faculty of Computer Science**, Research Assistant *September 2026 – Present*
 - Supporting research execution through protocol development, grant-process coordination, data analysis, and research documentation
- **LongChass Data Consulting**, Data Engineering Intern *Nov 2025 – Feb 2026*
 - Built and optimised Spark-based data pipelines in Databricks to clean, transform, and model large-scale datasets for product analytics and ad-hoc business insights.
- **Faculty of Computer Science, University of Sydney**, Casual Academic (Tutor) *2025 - Present*
 - Developed Lab Material and Demonstration Videos for courses: **INFO1112** Computing 1B Operating Systems and Network Platforms **ISYS2120** Data and Information Management

Relevant Personal Projects

- **ConfidEase**: [GitHub Link](#)
 - Improved resume ATS match rates by up to 40% by engineering an AI-powered NLP web application that performs keyword gap analysis and generates LLM-based optimisation suggestions.
 - **Tech:** Python, Flask, spaCy, HuggingFace (Flan-T5), BeautifulSoup, pdfplumber, feedparser, Jinja2, Matplotlib
- **PlanIT**: [GitHub Link](#)
 - Increased event engagement through a full-stack polling and discussion platform, enabling structured participant interaction beyond traditional RSVP-based systems.
 - **Tech:** Ruby, Ruby on Rails, PostgreSQL, SQLite, HTML/CSS
- **VimFEx**: [GitHub Link](#)
 - Built a browser-native Vim workspace with modal explorer navigation, split panes, and integrated PDF/text viewers so power users can arrange, browse, and edit files entirely from the keyboard.
 - **Tech:** JavaScript (ES Modules), DOM APIs, Node.js, PDF.js, Express-style HTTP services

Skills

- **Programming and Technical Expertise:**
 - **Languages:** Python, Java, C/C++, Ruby, JavaScript, SQL
 - **Data Engineering:** Apache Spark, Databricks, ETL Pipelines, Data Modelling, Batch Processing
 - **Backend Development:** RESTful APIs, Flask, Ruby on Rails, Express.js, Concurrent Request Handling
 - **Databases:** PostgreSQL, MySQL (Schema Design, Query Optimisation), Mongo DB
 - **Systems & Tools:** UNIX/Linux, Bash, Git, Docker (basic), CI/CD (GitHub Actions, Jenkins), LaTeX
 - **AI & Data:** RAG, Fine-Tuning, NLP, Transformer Models (HuggingFace), Data Analysis
 - **Networking:** Wireshark, Firewall Design and Management.
- **Communication**
 - Scored IELTS band 8 (out of 9). Worked in teams of multicultural people.

Extracurricular Activities

- **Sydney University Cyber Security Society**, Sub-Committee (Events) *2024 - Present*
 - Collaborated in the organization and execution of 4 cybersecurity events and workshops, reaching 30+ participants.
 - Designed and created presentation slides for 2 workshops. Contributed to designing the **Website of the Society**
- **Sydney University Bangladesh Student Association**, Events Director *2025 – Present*
 - Was In-Charge of 5 major University Funded events averaging 60+ attendees each
