Education

- **University of Sydney**, Bachelor of Advanced Computing (3rd Year), *Dalyell Scholar* 2023–Present
 - **Major:** Computer Science, **Minor:** Cyber Security
 - **Overall WAM:** High-Distinction (HD)
- **Certifications**
 - **Databricks Data Analyst Associate**, Databricks ([View Certificate](#)) September, 2025

Relevant Work Experience

- **LongChass Data Consulting**, Data Engineering Intern Nov 2025 – Feb 2026
 - Built and optimised Spark-based data pipelines in Databricks to clean, transform, and model large-scale datasets for product analytics and ad-hoc business insights.
- **Faculty of Computer Science, University of Sydney**, Casual Academic (Tutor) 2025 - Present
 - Developed Lab Material and Demonstration Videos for courses:
 - * **INFO1112** Computing 1B Operating Systems and Network Platforms
 - * **ISYS2120** Data and Information Management

Relevant Personal Projects

- **ConfidEase**: [GitHub Link](#)
 - Improved resume ATS match rates by up to 40% by engineering an AI-powered NLP web application that performs keyword gap analysis and generates LLM-based optimisation suggestions.
 - **Tech:** Python, Flask, spaCy, HuggingFace (Flan-T5), BeautifulSoup, pdfplumber, feedparser, Jinja2, Matplotlib
- **PlanIT**: [GitHub Link](#)
 - Increased event engagement through a full-stack polling and discussion platform, enabling structured participant interaction beyond traditional RSVP-based systems.
 - **Tech:** Ruby, Ruby on Rails, PostgreSQL, SQLite, HTML/CSS
- **VimFEx**: [GitHub Link](#)
 - Improved Vim workflow efficiency by developing a lightweight plugin that enhances navigation and editing ergonomics for power users.
 - **Tech:** Vimscript, Lua, Neovim API
- **Remote Code Execution Server**: [On an Old Android Phone](#)
 - Converted old Android phone into Server Capable of hosting own Applications with Sandboxed Process Handling
 - **Tech:** UNIX/Linux subprocess management, Node.js, Express, REST APIs, Android (Java/Kotlin)

Skills

- **Programming and Technical Expertise:**
 - **Languages:** Python, Java, C/C++, Ruby, JavaScript, SQL
 - **Data Engineering:** Apache Spark, Databricks, ETL Pipelines, Data Modelling, Batch Processing
 - **Backend Development:** RESTful APIs, Flask, Ruby on Rails, Express.js, Concurrent Request Handling
 - **Databases:** PostgreSQL, MySQL (Schema Design, Query Optimisation), Mongo DB
 - **Systems & Tools:** UNIX/Linux, Bash, Git, Docker (basic), CI/CD (GitHub Actions, Jenkins), LaTeX
 - **AI & Data:** NLP, Transformer Models (HuggingFace), Data Analysis
 - **Networking:** Wireshark, Firewall Design and Management.
- **Communication and Teamwork:**
 - Led logistics and archives for events with 200+ participants; managed volunteer teams effectively.
 - Scored IELTS band 8 (out of 9). Worked in teams of multicultural people.

Extracurricular Activities

- **Sydney University Cyber Security Society**, Sub-Committee (Events) 2024 - Present
 - Collaborated in the organization and execution of 4 cybersecurity events and workshops, reaching 30+ participants.
 - Designed and created presentation slides for 2 workshops. Contributed to designing the **Website of the Society**
- **Sydney University Bangladesh Student Association**, Events Director 2025 – Present
 - Was In-Charge of 5 major University Funded events averaging 60+ attendees each
